BIOSEEDS

ABOUT US

A prosperous farming community means a booming agriculture sector and a vibrant economy of the country. With the global agriculture sector adopting new technology and farming methods, it is imperative for the Indian farmers to progress with the times.

Sharayu Seeds Private Limited, specialises in providing a wide range of hybrid seeds to the Indian farmer. Our top quality seeds are aimed at progressive farmers who are seeking to achieve high standards of cultivation, in Vegetable Farming. For this, the company is committed to evolving new hybrids for the benefit of the agriculture sector.

OUR CORE STRENGTHS

Our Research and Development (R&D) department is the hub of the breeding efforts. It is the nerve center of the company from where new ideas flow. By applying the company's core strengths - innovation, expertise and experience, new combinations are tried, new experiments are done while traditional breeding methods are also used. Added to that is an expert and knowledgeable team which works hands-on with the farming community and the information garnered from them is used to cater to their and genetics of the products. Our dedicated and progressive approach makes us unique in the Indian seeds market. We conduct regular tests, both in laboratory and on multi-located fields, to maintain consistent quality.

Sharayu Seeds Private Limited, aimed at supplying field crop seeds at affordable rates. The company has promising research varieties in crops like Soybean, Maize, Pearl Millet and in vegetable crops like Onion, Okra, Water Melon, Sweet Corn, Gourds, Tomato, Chilli & Bajra.

The company also handles the vegetable seeds portfolio and is also associated with globally renowned research centers to be up-to-date with the latest developments in the vegetable seed industry all over the world. We have a large collection of Germ plasm, research material and research varieties, an important asset for any seed company, acquired from Pune Based 'Kumar Bioseeds & And Agro Products Pvt. Ltd.' through legal formalities. This research material acquisition is indeed a spring board for us to take a leap in Indian Vegetable Seed Market. Currently, we test our hybrids on parameters like taste, flavor & shelf life etc. We also work on increased virus, pest and disease tolerance along with ability to give higher yield by our research varieties..

OUR GOAL

The need of the farmers is very close to our heart. Through our product portfolio, we ensure that their journey from seed to soil to crop is successful. Our pan-India Experienced and dedicated sales and distribution team is always ready to support the farmers and fulfill their dreams. Sow the seeds of success and reap the rewards of modern, progressive farming

From MD's Desk

To be very frank I had never thought of starting seed business but it happened all of a sudden during Covid-19 lock down and when I had just retired from job. At MSSC as general Manager as (Marketing) One fine day while I was having leisure time with family, one of my industry friend, a seed producer brought me in to the business and started off my journey as an entrepreneur by starting a seeds marketing firm **'Ram Agri Marketing Services'**. The entire relations that I have developed across the country during my services with various organizations were very much welcoming and supporting for this endeavour. This boosted me to start a new company **Sharayu Seeds Pvt. Ltd.**

'Sharayu Seeds' a field crop company specially focussing on Soybean Seeds Sales instantly got recognition and appreciation. It was in and for the **'Sharayu Seeds'** That I had discovered to utilize over 32 years' vast industry experience.

I have always thought big for Distributors, Farmers and my Company only because of the trust bestowed in me by the industry! It is sure the driving force. The overwhelming support to Sharayu brand has inspired me to present wide range of vegetable seeds. in just a short span of 3 years!

Our seeds are marketed under the flagship brand **'Sharayu Mangalam Bioseeds'**.

I comprehend that it is only the quality and service which has delighted the farmers and we are confident that distributors will also consider 'this vegetable seeds brand as an ideal solution to their vegetable seeds needs.

Our biggest asset is highly dedicated team of experienced professionals. We have a clear vision about building our strengths and on our achievements while holding dear to us our basic principles.

Our biggest asset is highly dedicated team of experienced professionals. We have a clear vision about building our strengths and on our achievements while holding dear to us our basic principles.

I am confident that these companies will continue to scale milestones of excellence in delivering quality products and services for the years to come, needless to say with continued support from you all valued business partners.

Always with you & Best wishes for all your new endeavours.

Ramchandra Nake
Managing Director.

Quality Is Everything.
We Supply The Best Seeds.

RESEARCH SOYBEAN

SHRADDHA

Sowing Season : Kharif
Duration : 95 to 100 days
Seeds Rate : 25 kg / Acre

Characteristics of the variety

- The base of this variety is JS-335 hence it is sturdy & can with stand climate stress.
- This variety is suitable for both irrigated as well as rainfed conditions.
- Tolerant to yellow mosaic virus.
- The flowers are white in color.
- Plant bears lot of three seeded pods.

Area of Cultivation

Recommended for MS, GJ, AP, TL, & MP.

Size and Type

- Semi-determinate Plant with glossy leaves.
- White flowers.
- Creamiest Yellow seeds with pale brown hilum.
- Resistant to pod cracking.

Soil Type

Well Drained, Medium to Heavy Soil.

OUR TECHNICALLY PRODUCED SOYABEAN VARIETIES AVAILABLE IN BOTH TRUTHFUL AND CERTIFIED LABELS.

Soyabean KDS 992 PHULE DURVA

Characteristics of the variety

- Easy to harvest due to better height, support mechanical harvesting.
- Medium sized light yellow seeds with brown hilum.
- Resistant to wilting & pod cracking.
- Suitable for areas with less rainfall also for irrigated areas.

Soyabean MAUS-612

Characteristics of the variety

- Pods do not crack for 10-15 days after ripening.
- This variety is resistant to various pests and diseases.
- This variety is tolerant to low humidity

Soyabean KDS-753 PHULE KIMAYA

Characteristics of the variety

- Medium size seeds.
- Resistant to Rust.
- Oil content : 18.25%.
- Plant growth semi - deter minate.

Soyabean KDS-726 PHULE SANGAM

Characteristics of the variety

- Known for good disease resistance.
- Effect of stem fly and wheat leaf rust disease is less.
- Big & bold seeds size.
- High yielding variety.

Soyabean MAUS-162

Characteristics of the variety

- Suitable for mechanical harvesting.
- Resistant to Stem fly & gerdel betel.
- Also yields better in water logged conditions.

Soyabean AMS 100-39 P.D.K.V. AMBA

Characteristics of the variety

- Early maturing variety (94-96 days)
- Resistant to Root rot / steam rot disease.
- Moderately resistant to aphids and aphids

Soyabean JS-9305

Characteristics of the variety

- Resistant to root & tolerance to major biotic stress.
- it has glabrous leaf, stem & pods.
- Oil percentage 18 to 19 %

Notified Gram PKV KABULI-2

CHARACTERISTICS OF THE VARIETY

- The seeds are pinkish white & bold in size.
- The variety is resistant to wilt disease.
- The plant has a semi-spreading growth habit with 4-5 basal branches.
- The flowers are white in color.
- The stem is normally green but turns yellow at maturity.
- The pods are very bold.
- The maturity period is 80 to 90 days.
- The seed rate is 30 kg per acre.
- The variety is suitable for all types of soil.

Notified Gram VIJAY

VARIETY NAME : VIJAY PHULE G-81-1-1

- Sowing Time : Optimum sowing period for chickpea
- Rainfed crop : 20th to 10 Oct
- Irrigated crop : 20th to 10 Nov
- Duration : 105-110 Days
- Seed rate : 30 kg / Acre
- Source : MPKV, Rahuri
- Year of Release : 1993

Characteristics of the variety

- High yield potential, wilt resistant, drought tolerant.
- Suitable for rainfed, irrigated and late sown conditions.
- Released for Maharashtra, Madhya Pradesh and Gujarat.

Notified Gram JAKI-9218

VARIETY NAME : JAKI-9218

- Sowing Time : Optimum sowing period
- Rainfed crop : 20th to 10 Oct
- Irrigated crop : 20th to 10 Nov
- Duration : 95-115 Days
- Seed rate : 30 kg / Acre
- Source : ICRISAT, Hyderabad
- Year of Release : 1997

Characteristics of the variety

- High yield potential, wilt resistant, drought tolerant.
- for rainfed, irrigated and late sown conditions.
- Released for AP, Telangana, Maharashtra, Madhya Pradesh and Gujarat.

HYBRID MAIZE

AVADHUT

MMH-223

VARIETY NAME : AVADHUT MMH-223

- Sowing Time : KHARIF & RABI
- Duration : 115 TO 125 days
- Seed rate : 8 kg / Acre

CHARACTERISTICS OF THE VARIETY

- Resistant to various, pest & Diseases.
- High yielding Single Cross Hybrid.
- Its unique plant structure allows high density population.
- 70% to 80% Plants bear fully filled double cobs.
- Plant height: 10 to 12 ft.
- Plant bears broad leaf structure.
- Highly recommended for silage purpose.

HYBRID MAIZE

GURUDEV

HY. CORN-733

VARIETY Name : GURUDEV HY. CORN-733

- Sowing Time : KHARIF & RABI
- Duration : 120 To 140 days
- Seed rate : 8 kg / Acre

Characteristics of the variety

- Resistant to various pests and diseases.
- High yielding Single Cross Hybrid.
- Very high yield potential.
- The yield potential is good, with shelling up to 84%
- Plant Height : 210-220 cm. / Grain color: Orange.
- This variety has a strong stem and vigorous growth.
- This hybrid can be grown on both irrigated and rainfed conditions.

Hybrid Maize DIGAMBAR KMH-101

VARIETY NAME : DIGAMBAR KMH-101

- Sowing Time : KHARIF & RABI
- Duration : 120 To 130 days
- Seed rate : 8 kg / Acre
- Spacing : R X R 45-60 CM
P X P 15 CM

Characteristics of the varitey

- Light husk cover hard for insect to penetrate and rain water.
- Excellent tolerance to various diseases.
- Strong Stem and vigorous growth.
- Cob Shape: Cylindrical with slightly tapering towards end.
- Cob Colour : Orange.
- Modified Single Cross Hybrid

Hybrid Maize SWAMI MMH-23

VARIETY NAME : SWAMI MMH-23

- Sowing Time : KHARIF & RABI
- Duration : 95 To 100 days
- Seed rate : 8 kg / Acre

Characteristics of the variety

- Good resistance to various diseases.
- Large cob with fully filled yellowish orange grains.
- Average plant height 280 to 300 cm.
- Spacing 60 cm x 25 cm.
- Double Cross Hybrid.

Hybrid Bajra SHWETA MBH-555

VARIETY NAME : SHWETA MBH-555

- Sowing Time : KHARIF & RABI
- Duration : 90 to 95 days

Characteristics of the variety

- 5-6 effective tillers.
- Compact ear head with excellent tip filling.
- Attractive greenish grey bold grains.

Irrigation Requirement

- Need based irrigation at critical stages specially at time of flowering & grain filling should be done.

Hybrid Bajra VAJEER 570 G

VARIETY NAME : VAJEER 570 G

- Sowing Time : KHARIF & RABI
- Duration : 90 to 95 days

Characteristics of the variety

- Hairy ear heads.
- Uniform ears and crop.
- High yielding potential.
- Attractive dark grey colored grains.
- Suitable for Kharif as well as summer.
- More sprouts, more green fodder.

Irrigation Requirement

- Need based irrigation at critical stages specially at time of flowering and grain filling should be done.

HYBRID SORGHUM GS-250

VARIETY NAME : GS-250

- Duration : 110 to 115 days
- Special Features : Bold & attractive grain

CHARACTERISTICS OF THE VARIETY

- This variety has a height of 185-205 (cm).
- It takes 66-70 days to flowering.
- It has semi compact & spherical ear.
- This is a Non-Lodging variety
- It has round, bold and lustrous grains

RESEARCH WHEAT SHARAYU SONA

CHARACTERISTICS OF THE VARIETY

- Type of grain: Hard, Lustrous & Bold grains.
- Seed Rate: 40 kg/acre.
- Best Suited for: Maharashtra, Madhya Pradesh, Chhattisgarh, Gujarat & Rajasthan.
- Spike Emergence : 75 days.
- Plant height: 100 cm.
- More tolerant to brown rust & terminal heat.
- Test weight : 52 g.
- Suitable for both early and late sowing.
- It has a profuse tillering habit.
- It has good chapatti making qualities.

SHARAYU SESAMUM (GUJARAT TIL-2)

CHARACTERISTICS OF THE VARIETY

- Days to 50% flowering : 40-45 days.
- Pale purple flowers.
- Dense hairy petals and hairy pods.
- Plant height 75-125 cm, medium sized leaves.
- Broad oblong capsule (2-2.5 cm) with four lobes.
- Matures in 90-95 days.
- Oil content-45-50%.

ONION RED KING

VARIETY NAME : RED KING

- Sowing Time : KHARIF & Late Kharif
- Duration : 95 to 105 days
- Pungency : Moderate
- Weight : 70 to 80 gm
- Storage capacity : 45 to 60 days

Characteristics of the variety

- Shiny red & round shaped bulb.
- No jointed bulbs, no bolting.
- High degree of tolerance to major pests & diseases.

ONION L. R. KING

VARIETY NAME : L. R. KING

- Recommended Season : Rabi & Summer
- Duration : 120 to 125 days
- Pungency : High
- Bulb Weight (Avg) : 110 to 120 gm
- Storage capacity : 170 to 180 days

Characteristics of the variety

- Bulb colour light red & bulb shape round.
- High degree of tolerance to jointed bulbs & bolting.
- High degree of tolerance to major pests & diseases.

ONION PINK BALL

VARIETY NAME : PINK BALL

- Recommended Season : Late Kharif & Rabi
- Duration : 115 to 120 days
- Pungency : Medium
- Bulb Weight (Avg) : 105 to 115 gm
- Storage capacity : 150 to 170 days

Characteristics of the variety

- Pink Colour & Round shape bulb.
- High degree of tolerance to jointed bulbs & bolting.
- High degree of tolerance to major pests & diseases.

GRAMINEAE

SWEET CORN SUGAR CRUSH[®] KSCH-972

(For Maharashtra & Other States)

- Grain Colour : Golden yellow
- Rows per Cob : 16 to 18
- Brix Value : 13 to 16
- Plant Height : 200 to 210 cm, good foliage with broad leaves
- Excellent tip filling with prominent rows
- Maturity : 75 to 80 DAS
- Very good tolerance to diseases
- Suitable for processing industry

CARROT SHARAYU NANTES

(For Other States)

- Root Colour : Deep Orange
- Root Shape : Long Cylindrical
- Root Length : 17 to 19 cm
- Root Weight : 160 to 170 g
- Core : Small and self
- Top Vigour : Very good
- High yielding vigorous plant
- Smooth, cylindrical roots having sweet taste with good storage capacity
- Good tolerance to Leaf Spot

AMARANTHACEAE

BEETROOT GHOOMAR KBRV-131

(For Other States)

- Shape : Uniform globe
- Shape : Uniform globe
- Maturity : 60 to 65 days
- Weight : 125 g
- Colour : Deep red
- Shelf Life : Good
- Adaptability : Wide
- Good for salad purpose
- Flesh : Dark red, ringless

CARROT SHARAYU KURODA

(For Other States)

- Root Colour : Orange
- Root Shape : Long Cylindrical
- Root Length : 15 to 18 cm
- Root Weight : 125 to 140 g
- Core : Small
- Top Vigour : Very good
- High yielding vigorous plant
- Smooth and cylindrical roots with Self core, sweet taste good storage capacity
- Good tolerance to Leaf Spot

BEETROOT KBRH-1122

(For Maharashtra & Other States)

- Shape : Uniform globe
- Size : Medium
- Maturity : 50 to 55 days
- Weight : 150 to 160 g
- Colour : Dark red
- Shelf Life : Good
- Wide range of adaptability, extremely uniform, high yield, consistent quality, low zoning, late bolting and good storage ability
- Tolerant to Cercospora Leaf Spot, PM and DM

BRASSICACEAE

RADISH KRDH-1212

(For Maharashtra & Other States)

- Root Colour : White
- Root Shape : Cylindrical
- Root Length : 28 to 30 cm
- Root Surface : Smooth
- Root Flesh : Crispy
- Pungency : Mild
- Habit : Semi-upright with serrated green leaves
- Maturity : 50 to 55 DAS
- Straight cylindrical root, non-forking, smooth surface, non-pithiness

APIACEAE

CORIANDER KCOH-0801

(For Maharashtra & Other States)

- Vigorous plant
- Broad leaves with bright dark green colour
- Bushy, multi-cutting and multiple side branching
- Nice and rich aroma
- 35 to 40 days for first cutting
- Tolerant to Bolting

RADISH JAPANESE WHITE

(For Maharashtra & Other States)

- Root Colour : White
- Root Shape : Tapering
- Root Length : 30 to 32 cm
- Root Surface : Smooth
- Root Flesh : Crispy
- Pungency : Mild
- Habit : Semi-upright with serrated green leaves
- Maturity : 45 to 50 DAS
- Straight root, non-forking, smooth surface, non-pithiness
- Good FHC without loss of taste

BRASSICACEAE

CABBAGE

KCH-401

(For Maharashtra & Other States)

- Head Shape : Compact Round
- Head & Leaf Colour : Green head with bluish green leaves
- Maturity : 60 to 65 DAT
- Head Weight : 1.4 to 1.5 kg
- Field Holding Capacity : 25 to 30 days
- Season : Kharif, Rabi and Summer
- Tolerant to Black Rot

CABBAGE

KCH-402

(For Maharashtra & Other States)

- Head Shape : Compact Round
- Head & Leaf Colour : Green head with bluish green leaves
- Maturity : 55 to 60 DAT
- Head Weight : 1 to 1.2 kg
- Field Holding Capacity : 15 to 20 days
- Season : Kharif, Summer
- Tolerant to Black Rot

CUCURBITACEAE

BITTER GOURD

KBIH-20

(For Maharashtra & Other States)

- Fruit Colour : White
- Fruit Shape : Spindle
- Fruit Length : 20 to 22 cm
- Fruit Weight : 130 to 140 g
- Prickle : Medium thick and sharp
- Vine Vigour : Excellent
- First Picking : 45 to 50 DAS
- Excellent yield potential. Attractive fruit colour, good shelf life
- Tolerant to CMV, PM and DM

BITTER GOURD

GS-55 (For Maharashtra)

AMOL SBIH-25 (For Other States)

- Fruit Colour : Attractive green
- Fruit Shape : Spindle
- Fruit Length : 18 to 20 cm
- Fruit Weight : 120 to 130 g
- Prickle : Continuous pointed and flexible
- Vine Vigour : Excellent
- First Picking : 50 to 55 DAS
- Prolific fruiting with high yield
- Recommended for rainy and summer season
- Tolerant to CMV, PM and DM

BITTER GOURD

KBIH-27

(For Maharashtra & Other States)

- Fruit Colour : Green
- Fruit Shape : Short spindle, chu-chu type
- Fruit Length : 6 to 8 cm
- Fruit Weight : 30 to 40 g
- Prickle : Thick, sharp, pointed and hard
- Vine Vigour : Excellent
- First Picking : 47 to 50 DAS
- Good shelf life and high yield potential
- Tolerant to CMV, PM and DM

BITTER GOURD

SUMOL SBIH-28

(For Other States)

- Fruit Colour : Dark green
- Fruit Shape : Spindle
- Fruit Length : 14 to 18 cm
- Fruit Weight : 110 to 120 g
- Prickle : Continuous blunt spines
- Vine Vigour : Excellent
- First Picking : 45 to 50 DAS
- Attractive shape and spine pattern fetches better acceptability in the market
- Tolerant to CMV, PM and DM

BOTTLE GOURD

KBOH-11

(For Maharashtra & Other States)

- Fruit Colour : Attractive light green with tender hair
- Fruit Shape : Cylindrical
- Fruit Length : 35 to 40 cm
- Fruit Weight : 750 to 800 g
- First Picking : 55 to 60 DAS
- Vine Vigour : Vigorous growth with strong foliage density
- Uniform shape and size, prolong tenderness

BOTTLE GOURD

GS-14 (For Maharashtra)

PRASAD SBOH-14 (For Other States)

- Fruit Colour : Light Green
- Fruit Shape : Cylindrical
- Fruit Length : 30 to 32 cm
- Fruit Weight : 800 to 850 g
- First Picking : 55 to 60 DAS
- Vine Vigour : Excellent
- Cylindrical attractive fruit colour and fruit length
- Good shelf life and high yield potential
- Highly tolerant to PM and DM

RIDGE GOURD KRGH-15

(For Maharashtra & Other States)

- Fruit Colour : Attractive dark green
- Fruit Length : 28 to 32 cm
- Fruit Weight : 130 to 140 g
- First Picking : 42 to 46 DAS
- Uniform cylindrical shaped long fruits with deep ridges
- Vine Vigour : Excellent
- Cylindrical attractive fruit colour and fruit length
- Good for packing and shipping
- Good tolerance to CMV, PM and DM

RIDGE GOURD KRGH-16

(For Maharashtra & Other States)

- Fruit Colour : Green
- Fruit Length : 45 to 50 cm
- Fruit Weight : 145 to 155 g
- First Picking : 45 to 50 days
- Prominent ridges, attractive fruit colour, good shelf life, bitter-free and high yield potential
- High tolerance to CMV, PM and DM

SPONGE GOURD SHWET SSGH-50

(For Other States)

- Fruit Colour : Light Green
- Shape : Cylindrical, long and thin
- Fruit Length : 26 to 30 cm
- Fruit Weight : 130 to 140 g
- First Picking : 45 to 50 DAS
- Vine Vigour : Excellent
- White seeded, attractive light green tender fruits
- Excellent yield potential
- High tolerance to CMV, PM and DM

SPONGE GOURD SHLOK SSGH-51

(For Other States)

- Fruit Colour : Green
- Shape : Cylindrical
- Fruit Length : 26 to 28 cm
- Fruit Weight : 130 to 140 g
- First Picking : 45 to 50 DAS
- Uniform size and shape
- Prolific and continuous fruiting with high yield
- High tolerance to CMV, PM and DM

SPONGE GOURD KSGH-55

(For Maharashtra & Other States)

- Fruit Colour : Dark green
- Shape : Cylindrical
- Fruit Length : 24 to 26 cm
- Fruit Weight : 80 to 90 g
- First Picking : 45 to 50 DAS
- Vine Vigour : Excellent
- Lustrous tender fruits
- Good shelf life
- High yield potential
- High tolerance to CMV, PM and DM

CUCUMBER KCUH-1001

(For Maharashtra & Other States)

- Fruit Colour : Dark green with light shade
- Fruit Shape : Cylindrical
- Fruit Length : 14 to 16 cm
- Fruit Weight : 140 to 160 g
- First Picking : 35 to 40 DAS
- Prolific bearing
- High yield potential
- Very good tolerance against CMV

CUCUMBER KCUH-1002

(For Maharashtra & Other States)

- Fruit Colour : Greenish white
- Fruit Shape : Cylindrical
- Fruit Length : 14 to 16 cm
- Fruit Weight : 130 to 140 g
- First Picking : 35 to 40 DAS
- Prolific bearing, high yield potential
- Disease Tolerance : Very good

PUMPKIN KPKH-531

(For Maharashtra & Other States)

- Fruit Shape : Flat round
- Fruit Colour : Dark green with off-white patches
- Fruit Weight : 4 to 5 kg
- Flesh Colour : Creamish yellow
- First Harvest : 75 to 80 DAS
- Vine Vigour : Excellent
- Suitable for long transportation
- High tolerance to PM and DM

WATERMELON

KWMH-701

(For Maharashtra & Other States)

- Fruit Shape : Oblong
- Fruit Colour : Blackish green
- Fruit Weight : 2.5 to 4 kg
- Flesh Colour : Dark red
- TSS : 13%
- Taste : Very sweet and crispy
- Maturity : 70 to 75 DAS
- Crop Duration : 75 to 80 days
- Excellent yield potential
- Good tolerance to CMV

MUSKMELON

KMMH-775

(For Maharashtra & Other States)

- Fruit Shape : Round
- Fruit Weight : 1.5 to 1.7 kg
- Fruit : Tough netted
- Fruit Cavity : Very less
- Flesh Color : Orange
- TSS : 13.7%
- Aroma : Very good
- Crop Duration : 75 to 80 days
- Good shelf life
- High tolerance to DM, PM and viruses

WATERMELON

KWMH-702

(For Maharashtra & Other States)

- Fruit Shape : Oblong
- Fruit Colour : Light green with dark green stripes
- Fruit Weight : 6 to 8 kg
- Flesh Colour : Red
- TSS : 12%
- Taste : Sweet and crispy
- Maturity : 75 to 80 DAS
- Excellent yield potential
- Good tolerance to CMV

SOLANACEAE

TOMATO

ISHAN STOY-605

(For Other States)

- Fruit Colour : Red
- Fruit Shape : Slightly flat round with green shoulder
- Fruit Weight : 90 to 110 g
- Fruit Firmness : Very Good
- First Picking : 65 to 70 DAT
- Plant Type : Semi-determinate
- Good tolerance to Blight

WATERMELON

KWMH-703

(For Maharashtra & Other States)

- Fruit Shape : Round
- Fruit Colour : Blackish green
- Fruit Weight : 4 to 6 kg
- Flesh Colour : Red
- TSS : 13%
- Taste : Sweet and crispy
- Maturity : 70 to 75 DAS
- Excellent yield potential
- Good tolerance to CMV

TOMATO

KTOH-606

(For Maharashtra & Other States)

- Fruit Colour : Attractive red
- Fruit Shape : Square round
- Fruit Weight : 90 to 100 g
- Fruit Firmness : Very good
- First Picking : 65 to 70 DAT
- Plant Type : Semi-determinate
- Good for long transportation
- Very good tolerance to early and late blight

WATERMELON

SWMH-707

(For Other States)

- Fruit Shape : Oblong
- Fruit Colour : Dark black
- Fruit Weight : 3 to 5 kg
- Flesh Colour : Dark red
- TSS : 13.5%
- Taste : Sweet and crispy
- Maturity : 75 days
- Excellent yield potential
- Good for long transportation
- Good tolerance to CMV

TOMATO

MARSHALL

(For Maharashtra & Other States)

- Fruit Colour : Dark red
- Fruit Shape : Square round
- Fruit Weight : 90 to 100 g
- Fruit Firmness : Very good
- First Picking : 65 to 70 DAT
- Plant Type : Semi-determinate
- Heat Tolerance : Very good
- Very good tolerance to TYLCV and Blight

HOT PEPPER

KHPH-0565

(For Maharashtra & Other States)

- Fruit Colour : Attractive light green lustrous fruits
- Fruit Length : 12 to 14 cm
- Pungency : High
- Plant Type : Erect
- Moderate wrinkles on fruits
- Good for fresh market with very good yield potential
- Moderate tolerance to sucking pests

HOT PEPPER

SAMYUKTHA SHP-8831

(For Other States)

- Early and good yielding.
- Medium pungent.
- Deep bright red dry with medium wrinkles.
- Size - Medium 15 cm.
- Dense bearing.
- Plants have strong and healthy growth habit.
- Resistant to Fusarium wilt and bacterial wilt.

HOT PEPPER

YASHMITA KHPH-896

(For Maharashtra & Other States)

- Fruit Colour : Dark green
- Fruit Length : 8 to 9 cm
- Fruit Diameter : 1 to 1.1 cm
- Pungency : High
- Plant Type : Semi-erect
- First Picking : 60 to 65 DAT
- Slight wrinkles, prolific bearing
- Tolerant to Anthracnose and LCV

HOT PEPPER

SHARVI SHP-8341

(For Other States)

- Semi erect and Strong plant structure.
- Suitable for fresh & Dry Purpose.
- Length x Thickness: 13 x 1.2 cms
- Brilliant red dry chilli with high colour content.
- Good resistance to Chilli LCV.
- Fruit surface is semi wrinkled.
- First Picking from 45-50 DAT in Kharif season.
- Fresh green picking interval 8-10 days.

HOT PEPPER

TEJANSH KHPH-899

(For Maharashtra & Other States)

- Fruit color (green and until ripe):
- dark green, bright red
- Fruit length: 8-9 cm
- Fruit thickness: 0.7-0.9 cm
- Fruit surface: slightly wrinkled
- Pungency of the fruit: Very high
- Very long shelf life, highly suitable for long distance transportation, tolerant to sooty mold and wilt.
- Tolerant to anthracnose

EGGPLANT

DINESH SEPH-206

(For Other States)

- Fruit Colour : Green variegation with white patches
- Calyx : Green, non-spiny
- Fruit Shape : Oval
- Fruit Weight : 40 to 60 g
- Fruit Bearing : Cluster
- Plant Type : Semi-spreading
- First Picking : 55 to 60 DAT
- Good yield potential
- High tolerance to insect pests

HOT PEPPER

SUSHMITA SHP-8043

(For Other States)

- Robust and erect plant habit with excellent plant vigor.
- Long and thick fruits.
- Low Pungency.
- Uniform drying, high circular wrinkle.
- Very good red dry Color.
- Deep bright red color on ripening.
- Fruit Length 15 cm, diameter 1.6 cm.

EGGPLANT

BADHSHAHA (For Maharashtra)

KALPESH KEPH-218

(For Other States)

- Fruit Colour : Bright purple with white stripes
- Calyx : Green with prominent spines
- Fruit Shape : Oval
- Fruit Weight : 60 to 70 g
- Fruit Bearing : Solitary
- First Picking : 65 to 70 DAT
- Plant Type : Semi-erect
- Suitable for regular season
- Good tolerance to diseases

EGGPLANT SIDDHESH SEPH-202

(For Other States)

- Fruit Colour : Dark Purple
- Calyx : Green
- Fruit Shape : Medium long
- Fruit Length : 13 to 15 cm
- Fruit Weight : 50 to 60 g
- Fruit Girth : 3 to 4 cm
- Fruit Bearing : Solitary
- Plant Type : Semi-spreading
- First Picking : 60 to 65 DAT
- Good tolerance to diseases

EGGPLANT JAYESH SEPH-219

(For Other States)

- Fruit Colour : Green variegation with white patches
- Calyx : Green spiny
- Fruit Shape : Oval round
- Fruit Weight : 40 to 60 g
- Fruit Bearing : Solitary or pair
- First Picking : 60 to 65 DAT
- Plant type : Semi-spreading
- Good yield potential
- Tolerant to Little Leaf of Brinjal

EGGPLANT KEPH-221

(For Maharashtra & Other States)

- Fruit Colour : Purple with white and light green stripes
- Calyx : Green, spiny
- Fruit Shape : Oval round
- Fruit Weight : 40 to 60 g
- Fruit Bearing : Solitary and cluster
- First Picking : 55 to 60 DAT
- Plant Type : Semi-erect
- High yield potential
- Tolerant to Little Leaf of Brinjal

EGGPLANT KEPH-222

(For Maharashtra & Other States)

- Fruit Colour : Dark purple
- Calyx : Green, non-spiny
- Fruit Shape : Oval
- Fruit Weight : 60 to 80 g
- Fruit Bearing : Solitary
- First Picking : 44 to 48 DAT
- Plant Type : Semi-erect
- Suitable for regular season
- Good tolerance to diseases

EGGPLANT KEPH-225

(For Maharashtra & Other States)

- Fruit Colour : Black
- Calyx Colour : Green, non-spiny
- Fruit Shape : Oval
- Fruit Weight : 200 to 250 g
- First Picking : 60 to 65 DAT
- Fruit Bearing : Solitary
- Plant Type : Semi-erect
- Suitable for regular season, good for *Bharta*
- Good tolerance to diseases

CLUSTER BEAN VINULEE

(For Other States)

- Pod Colour : Light green
- Pod Length : 13 to 15 cm
- Pods per Cluster : 14 to 15
- Plant Type : Erect and medium tall, predominantly single stem
- First Picking : 45 to 50 DAS
- Very long, smooth uniform pods
- Very good taste quality
- High yield potential

ASTERACEAE

MARIGOLD SMGH-103

(For Maharashtra & Other States)

- Flower Colour : Orange
- Flower Weight : 10 to 15 g
- Flowers : Compact in Cluster
- Flower Diameter : 5 to 6 cm
- Plant Vigour : Good
- Plant Height : 80 to 90 cm
- Plant Type : Medium tall
- Branching Habit : Spreading
- First Picking : 45 DAT
- 30 to 35 pickings. Early picking and uniform flower size.
- Suitable for Kharif and Rabi

MARIGOLD SMGH-104

(For Maharashtra & Other States)

- Flower Colour : Deep yellow
- Flower Weight : 10 to 15 gm
- Flowers : Compact in Cluster
- Flower Diameter : 5 to 6 cm
- Plant Vigour : Good
- Plant Height : 85 to 90 cm
- Plant Type : Medium tall
- Branching Habit : Spreading
- First Picking : 45 DAT
- 30 to 35 picking. Early picking and uniform flower size.
- Suitable for Kharif and Rabi

OKRA HYBRIDS

GOMBO

(For Maharashtra & Other States)

- Fruit Colour : Dark green
- Fruit Length : 9 to 11 cm
- Fruit Weight : 9 to 10 g
- Fruit Diameter : 1.4 to 1.5 cm
- Lobes per Fruit : 5
- Branches per Plant : 2 to 3
- Plant Habit : Vigorous, erect
- First Harvest : 45 to 50 DAS
- Tender and thin fruits. Close internodes, short height, high yield.
- High tolerance to YVMV, ELCV and OLCV.

OVI

(For Maharashtra & Other States)

- Fruit Colour : Lustrous green
- Fruit Length : 8 to 10 cm
- Fruit Weight : 7 to 9 g
- Fruit Diameter : 1.3 to 1.5 cm
- Lobes per Fruit : 5
- Branches per Plant : 1 to 2
- Plant Habit : Vigorous and erect
- First Harvest : 44 to 48 DAS
- Tolerant to YVMV, ELCV and OLCV

KOH-339

(For Maharashtra & Other States)

- Fruit Colour : Dark green
- Fruit Length : 12 to 14 cm
- Fruit Weight : 11 to 12 g
- Fruit Diameter : 1.5 to 1.8 cm
- Lobes per Fruit : 5
- Branches per Plant : 2 to 4
- Plant Habit : Vigorous, erect, medium cut leaves
- First Harvesting : 45 to 51 DAS
- Tender fruits with good shelf life
- High tolerance to OLCV and YVMV

KOH-351

(For Maharashtra & Other States)

- Fruit Colour : Dark green
- Fruit Length : 8 to 10 cm
- Fruit Weight : 11 to 12 g
- Fruit Diameter : 1.3 to 1.4 cm
- Lobes per Fruit : 5
- Branches per Plant : 2 to 3
- Plant Habit : Vigorous, erect
- First Harvest : 40 to 45 DAS
- Suitable for all seasons
- High tolerance to YVMV, ELCV, OLCV, heat and cold

VANDE BHARAT

(For Other States)

- Fruit Colour : Lustrous dark green
- Fruit Length : 10 to 11 cm
- Fruit Weight : 10 to 11 g
- Fruit Diameter : 1.4 to 1.5 cm
- Lobes per Fruit : 5
- Branches per Plant : 2 to 3
- Plant Habit : Vigorous, erect
- First Harvest : 47 to 50 DAS
- High tolerance to YVMV, ELCV and OLCV

METHI **PUSA EARLY BUNCHING** (For Maharashtra & Other States)

- It has upright shoots and bold seeds.
- It can be used for both seed and leaf cutting.
- It has a high herbage yield.
- It is an early cultivar that can be harvested multiple times.

METHI PUSA EARLY BUNCHING

BOXER (BAT HH-210 BG II)

- Duration : 145-160 (days)
- Plant height : 140-155 (cm)
- Boll Weight : 5.5-6.5 (gm)
- Staple length : 36-39 (mm)
- Ginning : 37.0-38.0%

Characteristics of the variety

- Big bolls: The bolls are large and weigh 5-5.5 grams.
- Boll bursting: The bolls have a good tendency to burst.
- Sturdy plant: The plant is sturdy and has good boll retention.
- Easy picking: The bolls burst cleanly and are easy to pick.
- Medium duration : The crop duration is early to medium, lasting 145-160 days
- Sowing season: The sowing season is May-June.
- Sowing spacing: The R-R spacing is 4 ft, and the P-P spacing is 1.5 ft.

SIMBA (BAT HH-214 BG II)

- Duration : 155-160 (days)
- Plant height : 155-165 (cm)
- Boll Weight : 5.5-6 (g)
- Staple length : 30-31 (mm)
- Ginning : Round

Characteristics of the variety

- Resistant to all sucking pests.
- Superior performance in terms of yield.
- Advanced genetic traits.
- Plant habit: Bushy growth.
- Sowing spacing : R-R : 3 to 4 ft; P-P : 1.5 to 2 ft.

NAKUL (BAT HH-201 BG II)

- Duration : 140-150 (days)
- Plant height : 140-155 (cm)
- Boll Weight : 5.0-5.5 (g)
- Staple length : 28.5-29.5 (mm)
- Ginning : 37.0-38.0%

Characteristics of the variety

- Suitable for rainfed as well as irrigated cultivations.
- Highly tolerant to water stress conditions.
- Consistent in seed cotton yield
- Good retention capacity assures high staple
- Highly tolerant to sucking pests.
- Highly tolerant to leaf reddening.
